

Publications Order Form

Edible and Ornamental Herbs

Over recent years HDC has produced a wide range of factsheets and publications which you can order by putting a tick next to the publication(s) you require and returning this form to the address below.

Factsheets from 2012

- 29/12 Coriander Bacterial Blight
- 26/12 Bacterial diseases of protected ornamentals

Factsheets from 2011

- 11/11 IPM strategies for the control of aphids
- 08/11 Downy mildew of basil
- 10/11 Leafminers of cruciferous salad crops

Factsheets from 2010

- 16/10 Coriander bacterial blight
- 15/10 Septoria blight of parsley
- 13/10 Monitoring microbial food safety of fresh produce
- 06/10 Grower System for rearing the predatory beetle *Atheta coriaria*

Factsheets from 2009

- 17/09 Seed-borne diseases of ornamentals: prevalence and control
- 14/09 Thrips control on protected ornamental crops
- 13/09 Guidelines for minimising latent grey mould (*Botrytis cinerea*) in cut flowers and pot plants
- 12/09 The biology and control of mites in pot and bedding plants
- 10/09 Energy management in protected cropping: Management of CO₂ enrichment
- 09/09 Energy management in protected cropping: Horticultural lighting
- 08/09 Energy management in protected cropping: The use of screens
- 07/09 Energy management in protected cropping: Humidity control
- 06/09 Energy management in protected cropping: Manipulation of glasshouse temperature
- 05/09 Energy management in protected cropping: Good Housekeeping
- 03/09 Biobeds for treatment of pesticide waste and washings

Factsheets from 2008

- 01/08 A guide to simple and effective nursery trials

Factsheets from 2007

- 10/07 Guidelines on nursery hygiene for outdoor and protected ornamental crops

HDC is a division of the Agriculture and Horticulture Development Board

Factsheets from 2006

- 15/06 Water quality for irrigation of container ornamentals
- 14/06 Pesticide spray application for ornamental crops
- 13/06 Caterpillars of protected ornamental crops
- 01/06 Capillary irrigation of container grown nursery stock

Factsheets from 2005

- 27/05 Winter protection of container grown nursery stock
- 23/05 Disease control in protected lettuce
- 19/05 Methods and equipment for matching irrigation supply to demand in container-grown crops (HNS 97a)
- 16/05 Measuring and improving performance of overhead irrigation for container-grown crops (HNS 97a & HNS 122)
- 15/05 Use of chemical disinfectants in protected ornamental production
- 14/05 Control of whiteflies on protected ornamental crops
- 08/05 The biology and control of two-spotted spider mite in nursery stock
- 07/05 Securing your water supply for the future

Factsheets from 2004

- 16/04 Control of Phytophthora, Pythium and Rhizoctonia in container-grown hardy ornamentals
- 14/04 Hardy nursery stock - management of stock plants
- 07/04 Managing rabbit problems associated with horticulture
- 04/04 Control of downy mildew diseases on hardy nursery stock and herbaceous perennials

Factsheets from 2003

- 02/03 Vine weevil control in hardy nursery stock

Factsheets from 2002

- 25/02 Controlling humidity to minimise the incidence of grey mould in container-grown ornamentals: heated glasshouse crops
- 24/02 Control of grey mould in container-grown ornamentals: heated glasshouse crops
- 23/02 Control of grey mould in container-grown ornamentals: unheated glasshouse crops
- 12/02 Control of white rot in onions
- 09/02 Control of rust diseases of protected bedding plants
- 08/02 Control of sciarid flies in protected ornamentals
- 07/02 HNS integrated control of slugs and snails

Crop Walker Guides

- Herbs Crop Walkers' Guide
- Weed identification guide

Guides

- Slow Sand Filtration – A growers' guide
- Micro-Turbine CHP Units – Their application in protected horticulture

- Practical weed control for nursery stock – revised 2013
- Air movement guide in glasshouses

ID Cards

- Aphids commonly found in protected lettuce
- Herb Pest and Disease Cards

DVDs

- Creating champion employees – Out of Stock**
- Keeping it clean – assessing the risk of microbial contamination - Out of Stock**
- Health & safety in horticulture - an awareness DVD in ten languages (plus English)
- ‘Seize the opportunity’ A DVD-based programme aimed at increasing the awareness of the public procurement sector as a customer for UK growers

Computer Programs

- MORPH 4 download available from – www.warwick.ac.uk/go/morph/models
- HDC Irrigation Calculator and factsheet - A graphical tool to improve irrigation water distribution
